

San José State University
Department of Justice Studies
JS 203: Seminar in Applied Statistics in Justice
Spring 2019

Course and Contact Information

Instructor:	Bryce Westlake
Office Location:	Health Building 211
Telephone:	408-924-2743
Email:	Bryce.Westlake@sjsu.edu
Office Hours:	Monday and Wednesday, 2:00 pm to 5:00 pm
Class Days/Time:	Monday and Wednesday, 6:00 pm to 7:15 pm
Classroom:	MacQuarrie Hall 523
Prerequisites:	STAT 95, JS 105, or Equivalent
Recommended:	JS 202 or Equivalent

Course Format

I will utilize the [Canvas Learning Management System](#) as a means for distributing course materials such as syllabus, handouts, lecture slides, assignment instructions, and communications about changes to the course. You are responsible for regularly checking with the messaging system through [OneSJSU](#) to learn of updates.

Course Description

An evaluation of specific statistical methods for quantitative and non-quantitative analyses, concentrating on applications and interpretations in justice related settings.

Prerequisite: STAT 95 or equivalent, JS 105 or equivalent, and graduate standing.

Course Goals

The purpose of this course is to provide students with a baseline understanding of statistical methods commonly used in justice fields. This is important as students will be required to conduct and/or evaluate research in their chosen professions that can greatly impact their community. As a result, it is imperative that students have the tools to critically assess the validity and reliability of the data they are presented. My goal in this course is to simplify the basics of several statistical methods so that students can go into their careers with confidence that they can make appropriate research decisions.

Course Learning Outcomes (CLO)

Upon successful completion of this course, students will be able to:

1. Discuss the basic procedures of common quantitative statistical procedures used in criminology.
2. Identify and apply the most appropriate quantitative statistical procedures for the data.
3. Conduct, present, and write scientific research reports on quantitative data

Required Texts/Readings

Textbook

Borgatti, S.P., Everett, M.G., & Johnson, J.C. (2013). *Analyzing Social Networks*. London: Sage.
Brown, T. (2014). *Confirmatory Factor Analysis for Applied Research (2nd Edition)*. New York: The Guilford Press.

Other Readings

Supplied via Canvas.

Other technology requirements / equipment / material

Depending on the method selected for their final research paper, students will need to have access to SPSS (AMOS), SAS, or UCINET. More details will be provided in class.

Library Liaison

Silke Higgins, silke.higgins@sjsu.edu, (408) 808-2118, <http://libguides.sjsu.edu/justicestudies>

Course Requirements and Assignments

Success in this course is based on the expectation that students will spend, for each unit of credit, a minimum of 45 hours over the length of the course (normally **three hours per unit per week**) for instruction, preparation/studying, or course related activities, including but not limited to internships, labs, and clinical practica. Other course structures will have equivalent workload expectations as described in the syllabus.

Critical Discussion (15%): All participants are expected to take an active role in each seminar as both learners and teachers. You are expected to complete the weekly required readings prior to each seminar. You are going to benefit the most from class discussions, explanations, and activities if you have some knowledge about the concepts studied each week. In each class you should demonstrate that you have read the assigned materials ahead of time, raise and discuss issues, and fully engage with the class. Discussion in seminars will focus on both the readings and on your research projects. This assignment will specifically address CLO 1 & 2.

Research Presentation (15%): Prior to submitting a final paper, students will present their research to the class to a) get experience at presenting to their peers, and b) to receive feedback from peers and the instructor that can be integrated into their final research paper submission. More in-depth requirements are outlined in the Assignment Guidelines provided on Canvas. This assignment will specifically address CLO 3.

Research Paper (40%): Students will write an original, quantitative, research paper. You are responsible for finding your own dataset to analyze. There are plenty of datasets available, free of charge, through public repositories. You may use any of the techniques covered after Linear Regression. In addition to your research paper, you are to submit your final dataset(s) and a copy of the syntax file with notations, used to create the datasets and analyze the data. The research paper is to be properly formatted and referenced, using the style guide provided on Canvas. More in-depth requirements are outlined in the Assignment Guidelines provided on Canvas. This assignment will specifically address CLO 3

Big Quiz (30%): The *Big Quiz* will occur during the final exam period and will be comprised of material covered in the readings and lectures. Students will be allowed to have one page of notes for the exam. More details will be provided as the date draws near. This assignment will specifically address CLO 1 & 2.

Final Examination or Evaluation

Faculty members are required to have a culminating activity for their courses, which can include a final examination, a final research paper or project, a final creative work or performance, a final portfolio of work, or other appropriate assignment.

Grading Information

In order to receive a grade for this course, all course requirements must be met, and every assignment must be completed. Failure to complete all assignments may result in a failing grade for the course. Deadlines are firm. Late assignments/papers will not be accepted for full credit (without extenuating personal circumstances due to own or family health; or other university recognized excuse). In such cases, appropriate documentation must be shown to the instructor. Late assignments/papers will lose 10% for every calendar day that they are late, including weekend days. There are no opportunities for extra credit in this course.

Determination of Grades

A (plus)	97% to 100%	A	93% to <97%	A (minus)	90% to <93%
B (plus)	85% to <90%	B	80% to <85%	B (minus)	75% to <80%
C (plus)	70% to <75%	C	65% to <70%	C (minus)	60% to <65%
F	Below 60%				

Classroom Protocol

Office Hours: I am very flexible with office hours for graduate students. Let me know when you want to see me and we'll arrange something.

Email: Although I am receptive to email correspondence, I will only reply (to course-related emails) if I can do so in a few sentences. Please do not ask me to explain course concepts via email. If it requires more than a few sentences, you need to see me in-person.

Expectations of Students: I have very high expectations for graduate students that includes treating you as adults, capable of prioritizing your own schedule and seeking guidance/assistance when needed. However, with high expectations comes my dedication to helping you meet those expectations. If issues arise or if you are having struggles, the best advice I can give you is to contact me sooner rather than later. The less information I have to work with, the less I can be of assistance. It is your responsibility to seek out assistance when you need it. It is my responsibility to provide assistance when you request/need it.

Classroom: Students are to attend *all* classes and arrive on-time, prepared to discuss course material at the beginning of class. You are welcome to eat in class, but please be considerate of your classmates when doing so with regards to mess and smells. NO cell phone use during class. I expect them to be put away during class unless there is an emergency or family situation that requires you to have them out. If so, notify me at the beginning of the class, so I am aware of why it is out.

University Policies

Per University Policy S16-9 (<http://www.sjsu.edu/senate/docs/S16-9.pdf>), relevant information to all courses, such as academic integrity, accommodations, dropping and adding, consent for recording of class, etc. is available on Office of Graduate and Undergraduate Programs' [Syllabus Information web page](http://www.sjsu.edu/gup/syllabusinfo/) at <http://www.sjsu.edu/gup/syllabusinfo/> Make sure to review these university policies and resources with students.

JS 203: Seminar in Applied Statistics in Justice Spring 2019 Course Schedule

This course schedule is subject to change with fair notice, at the instructor's discretion. All reading assignments listed should be completed prior to class on that date. Additional readings may be assigned.

Week	Date	Topic	Readings	Videos
1	Jan. 28	Introduction	None	None
1	Jan. 30	Review (Descriptive Statistics)	JS 202 Course	https://youtu.be/LPHYPXBK_ks
2	Feb. 4	T-Test	Tech 1: T-Test (Canvas)	https://youtu.be/pTmLQvMM-1M
2	Feb. 6			
3	Feb. 11	Linear Regression	Tech 2: Linear Regression (Canvas)	Statistics 101: Simple Linear Regression (Videos 1-4) - https://youtu.be/ZkjP5RJLQF4
3	Feb. 13			
4	Feb. 18	Multiple Regression	Tech 3: Multiple Regression (Canvas)	Statistics 101: Multiple Regression (Videos 1-4) - https://youtu.be/dQNpSa-bq4M
4	Feb. 20			
5	Feb. 25	Issues with Data	<i>Optional</i> Data 1, 2, 3, & 4	None
5	Feb. 27			
6	Mar. 4	Survival Analysis (Cox Regression)	Survival 1, 2, & 3	https://youtu.be/iM9DitTOHBU https://youtu.be/Th0_SHH9zZI
