Course Learning Outcomes (CLOs)

Program learning outcomes (PLOs) are skills and knowledge that students will have achieved upon completion of the Psychology BA degree. Each course in our curriculum contributes to one or more of these PLOs. The PLOs for the Psychology BA degree are:

1. Knowledge Base of Psychology. Students will be able to demonstrate familiarity with the major concepts, theoretical perspectives, empirical findings, and historical trends in psychology.
2. Research Methods in Psychology. Students will be able to design, implement, and communicate basic research methods in psychology, including research design, data analysis, and interpretations.
3. Critical Thinking Skills. Students will be able to use critical and creative thinking, skeptical inquiry, and a scientific approach to address issues related to behavior and mental processes.
4. Applications of Psychology. Students will be able to apply psychological principles to individual, interpersonal, group, and societal issues. Values in Psychology. Students will value empirical evidence, tolerate ambiguity, act ethically, and recognize their role and responsibility as a member of society.

GE Area D: Social Sciences

Area D courses increase students' understanding of human behavior and social interaction in the context of value systems, economic structures, political institutions, social groups, and natural environments. Students develop an understanding of problems and issues from different disciplinary perspectives and examine issues in their contemporary as well as historical settings and in a variety of cultural contexts.

The CSU requires students to complete General Education courses in the Social Sciences in at least two different disciplines. Students may meet this requirement by either 1) taking two lower-division Area D courses in different disciplines, or 2) taking two lower-division Area D courses in the same discipline and an Area S upper-division GE course in a different discipline.

GE Area D Learning Outcomes

Upon successful completion of an Area D course, students should be able to:

1. demonstrate understanding of the ways in which social institutions, culture, and environment shape and are shaped by the behavior of individuals, both past and present;
2. compare and contrast the dynamics of two or more social groups or social systems in a variety of historical and/or cultural contexts;
3. place contemporary social developments in cultural, environmental, geographical, and/or historical contexts;
4. draw on social/behavioral science information from various perspectives to formulate applications appropriate to historical and/or contemporary social issues.

Writing Practice: Students will write a minimum of 1500 words in a language and style appropriate to the discipline.
